Masterclass

Work at the Clay Field with

Heinz Deuser

We are fortunate to welcome Prof Heinz Deuser, who has arrived from Germany to facilitate two Masterclasses on Work at the Clay Field. They will take place on 22 - 24 February at Claerwen Retreat in Victoria and 1 - 3 March at the Queensland branch of the Institute for Sensorimotor Art Therapy in Maleny. It has taken 45 years to develop this unique sensorimotor approach and it is the most effective and powerful art therapy

method I know. Children with behavioural and learning difficulties can especially benefit, but it has also proved life-changing for adults, in particular for those suffering from complex trauma and PTSD. The first weekend on 22 - 24 February had the theme of *Haptic Diagnosis*. The Masterclass was professionally filmed and translated, and it will be available from July 2019 onwards.
